- Interconnect with one of our Portable Water Towers for high speed truck fill;
- Connect to a complete Welltech turnkey control system including; back to back base SCADA connectivity, autonomous pump control, leakage detection, SMS alarms and remote HMI;
- Robust, reliable, short to long term solution for continuous sustainable water storage/supply;
- Designed and built in Western Australia by Welltech;
- Available with optional potable liner and cover in accordance with the Australian Drinking Water Quality Standards - AS/NZS 4020;
- Our fast, highly skilled teams are available to mobilise our in-house fleet at a moment's notice;
- You can be assured we will deliver as promised and you will be supported by Welltech's guarantee of *Commitment = Satisfaction*.

Delivering innovative solutions that work.

David Henderson

For over 30 years, David has been providing workable solutions in an industry that requires absolute commitment.

David takes full accountability and responsibility for each and every project, ensuring company values and promises are kept. This gives our clients confidence that we will make decisions and will provide answers when they need them.

David's training in project and contracts management delivers peace of mind that Welltech and our clients are all on the same page with a clear understanding of strict deadlines, as well as project compliance duties and responsibilities.

"If you can't find a solution elsewhere, you will find it here – guaranteed".

From an ambitious dream to reality.

Once committed, Welltech are renowned for being finishers.

"Our unwavering dedication and commitment to achieve the very best, drives us relentlessly towards the ever moving goal of absolute perfection."
